

200-level campaign review

Current playable values, map examples and proposed difficulty changes

Current issue: the larger boards use separated winding lanes. Many walls reveal the delivery circuit, so following the visible street can succeed without weighing several routes. Level 200 being cleared in two attempts is useful player feedback; grid size and longer runs have not delivered the intended challenge.

Level 200 today: 18 x 18; 8 houses required; 2 patrols plus Echo; 122 minimum moves without repair; 116 with its repair; 108 starting lights; 196 blocked tiles (60% of the board).

Implemented in this update: tappable icon rail beside the map; explanatory popups; a trapped player now loses with "No valid moves left", restart and level-selection actions. Mobile still uses separate bottom-tab screens.

Reading the tables: Houses means required / total. Minimum moves includes lighting at least the required houses and returning to the depot, with current patrol, Echo, gate, crossing and light rules. Repair assumes the listed permanent upgrade is purchased. Dash means no repair exists. Shadow counts include Echo; shadows activate after the first house.

Scope: the following redesign is a proposal for review. The existing 200 layouts have not been replaced in this update. Tables and diagrams describe the current playable maps, not the proposed redesign.

Difficulty redesign plan

Build decisions into the streets, then measure whether those decisions matter

1. Replace the single obvious circuit

Use open plazas joined by two or three looped streets. Place obstacle clusters at selected junctions rather than filling every gap between lanes. Target about 20-35% blocked tiles in trial maps; verify route choices rather than treating this percentage as a guarantee.

2. Make delivery order matter

Spread houses among separate districts. Provide at least three genuine decision junctions. Several house orders should be legal, but some should waste light or reach a gate at the wrong time. Keep the same tap-to-move controls.

3. Put shadows at meaningful crossings

Keep the established two patrols plus Echo. Place patrol loops across useful alternate routes, while avoiding house overlap. Keep predictable, visible behavior; the challenge comes from timing and route choice, not hidden randomness.

4. Tune light against the exact safe solution

Find the shortest feasible route with the actual shadow and crossing rules. Set the light budget close to the minimum feasible budget, allowing a small recovery margin. Do not size the lantern against a long guaranteed winding route.

5. Make repairs a choice with a measurable benefit

Keep a valid no-repair solution. A repair should save moves, unlock another delivery order or reduce timing pressure. Report its actual route benefit; do not require a purchase just to complete a level.

6. Trial before replacing all 100 later maps

Create ten candidate maps first, covering four to eight houses. Review phone play and screenshots. Require multiple meaningful routes, no repeated layouts and a verified no-repair win. Then expand in difficulty bands, using your play results to tune each band.

Levels 1-10

All values below describe the current playable campaign

Level	Grid	Houses	Min moves no repair	Min moves with repair	Shadows	Repair cost	Light cap	Walls
1	8 x 8	1 / 3	4	-	1	-	23	2 (3%)
2	8 x 8	1 / 3	4	-	1	-	23	2 (3%)
3	8 x 8	2 / 3	10	10	1	150	22	4 (6%)
4	8 x 8	2 / 3	10	-	1	-	21	4 (6%)
5	8 x 8	2 / 3	10	-	1	-	21	6 (9%)
6	8 x 8	2 / 3	18	18	1	450	22	12 (19%)
7	8 x 8	2 / 3	16	-	1	-	20	11 (17%)
8	8 x 8	2 / 3	16	-	1	-	20	7 (11%)
9	8 x 8	2 / 3	18	18	1	650	21	9 (14%)
10	8 x 8	3 / 3	22	22	1	1,150	22	12 (19%)

Level 1 | 8 x 8

Level 10 | 8 x 8

Shadows: Patrol.

Diagram key: blue = depot; gold = house; gray = blocked tile; purple = patrol route; green = switch; brown = fading crossing; pale blue = ice; dark blue = dark street. Echo follows recent player steps and has no fixed route.

Each diagram is an overhead terrain review, not a suggested winning route.

Levels 11-20

All values below describe the current playable campaign

Level	Grid	Houses	Min moves no repair	Min moves with repair	Shadows	Repair cost	Light cap	Walls
11	8 x 8	2 / 3	18	-	1	-	20	11 (17%)
12	8 x 8	2 / 3	18	-	1	-	20	9 (14%)
13	8 x 8	2 / 3	16	16	1	1,550	22	11 (17%)
14	8 x 8	2 / 3	18	-	1	-	20	11 (17%)

Level 131 | 12 x 12

Level 140 | 12 x 12

Shadows: Patrol + Second patrol + Echo.

Diagram key: blue = depot; gold = house; gray = blocked tile; purple = patrol route; green = switch; brown = fading crossing; pale blue = ice; dark blue = dark street. Echo follows recent player steps and has no fixed route.

Each diagram is an overhead terrain review, not a suggested winning route.

Levels 141-150

All values below describe the current playable campaign

Level	Grid	Houses	Min moves no repair	Min moves with repair	Shadows	Repair cost	Light cap	Walls
141	14 x 14	6 / 6	72	72	3	72,000	69	115 (59%)
142	14 x 14	6 / 6	80	80	3	72,975	73	109 (56%)
143	14 x 14	6 / 6	72	72	3	73,925	65	119 (61%)
144	14 x 14	6 / 6	72	72	3	74,900	65	119 (61%)
145	14 x 14	6 / 6	72	72	3	75,900	65	119 (61%)
146	14 x 14	6 / 6	70	70	3	76,875	62	120 (61%)
147	14 x 14	6 / 6	66	66	3	77,875	58	125 (64%)
148	14 x 14	6 / 6	80	76	3	78,875	72	111 (57%)
149	14 x 14	6 / 6	76	76	3	79,875	68	114 (58%)
150	14 x 14	6 / 6	76	74	3	80,900	68	115 (59%)

Level 141 | 14 x 14

Level 150 | 14 x 14

Shadows: Patrol + Second patrol + Echo.

Diagram key: blue = depot; gold = house; gray = blocked tile; purple = patrol route; green = switch; brown = fading crossing; pale blue = ice; dark blue = dark street. Echo follows recent player steps and has no fixed route.

Each diagram is an overhead terrain review, not a suggested winning route.

Levels 151-160

All values below describe the current playable campaign

Level	Grid	Houses	Min moves no repair	Min moves with repair	Shadows	Repair cost	Light cap	Walls
151	14 x 14	6 / 6	74	68	3	81,925	65	116 (59%)
152	14 x 14	6 / 6	66	66	3	82,950	65	117 (60%)
153	14 x 14	6 / 6	74	74	3	83,975	67	115 (59%)
154	14 x 14	6 / 6	76	68	3	85,025	67	115 (59%)
